EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose the skirting of the required height 60/120mm and choose the colour. 2. Lay the profile, taking care to calculate the width of the inside/outside corners (for the H: 60 mm version only). 3. Lay the skirting using an adhesive suitable for gluing flexible PVC onto mortar, plaster, accessorisised walls, etc. or fix with screws/nails.

As regards the items with adhesive, the adhesive roll is sold separately (50 lm for H:60), (100 lm for H:120)

EXEMPLES OF LAYING

SKIRTING 62F is a new 62 mm skirting board made of non-toxic, flexible vinyl resin. This profile is very resistant and particularly suited for providing highly aesthetic perimeter skirting of excellent quality at reasonable prices. It differs from the BTPV... 60 skirting board in that it is provided with a bottom flange that allows it to be placed perpendicularly (90°) to the wall/lining and skirting to PVC floors. In addition, the horizontal flange covers the floor's perimeter expansion joint. We recommend applying the skirting using glue/adhesive/Bostik/mastic. Alternatively, you can choose the self-adhesive version for quick, effortless installation.

LAYING INSTRUCTIONS

1. Choose the colour of the skirting board, indicating whether you want it with or without a self-adhesive backing. 2. Cut the skirting to length, taking into account the width of the internal and external connections. 3. Self-adhesive skirting is recommended only for surfaces that are perfectly smooth, non-oily and non-porous. On plaster and mortar surfaces, use a non-adhesive version and apply the skirting using quick-setting acrylic silicone suitable for gluing aluminium to mortar, plaster, etc.
